GENERAL HEADQUARTERS
SUPREME COMMANDER FOR THE ALLIED POWERS

AG 402.5 (29 Dec 47)GD
(SCAPIN 1835)

APD 500
29 December 1947

MEMORANDUM FOR: JAPANESE GOVERNMENT

THROUGH : Central Liaison Office, Tokyo

SUBJECT : Transfer of Responsibility for Receipt and Accounting
for Surrendered Supplies and Equipment Returned
to the Japanese Government.

1. Reference is made to CLO 9670(PH), 18 December 1947, subject
"Transfer of Work Concerning Disposal of Commodities Returned by
GHQ, SCAP to Japanese Government from Home Ministry to Construction
Board in Connection with Dissolution of Home Ministry."

2. In view of the impending dissolution of the Home Ministry,
the Construction Board (KENSETSU-IN) is designated as the successor
agency of the Japanese Government to receive and account for supplies,
materials, and equipment of the former Japanese armed forces that
have been or will be returned to the control of the Japanese
Government. The transfer of responsibility from the Home Ministry
to the Construction Board will be accomplished without interruption.

3. All records which have been maintained by the Home Ministry
in connection with the receipt and disposition of the supplies,
materials, and equipment so returned will be transferred intact to
the custody of the construction Board which shall henceforth be charged
with the responsibility for their maintenance.

4. All directives which have been issued by General Headquarters,
Supreme Commander for the Allied Powers treating with the return
of surrendered supplies, materials, and equipment to the Japanese
Government wherein the Home Ministry was referred to as the
responsible agency thereof, shall now be construed to refer to the
Construction Board with equal force and effect.

2. The following instructions cover the collection, classification and disposition of all captured or surrendered Japanese Samurai or other type swords and/or firearms.

3. The collection and/or confiscation of swords and firearms from Japanese individuals is a function of the Japanese civil police as directed by the Imperial Japanese Government (See Incl #2). Prefectural military government teams will supervise this work within the area of their responsibility. Tactical troops formerly charged with the responsibility of such collections are hereby relieved of that mission and stocks of swords now in the custody of tactical troops will be turned over to the Japanese civil police. Receipts will be obtained in duplicate; one (1) copy will be forwarded to the local military government unit. When requested to do so, the local military government unit will furnish necessary liaison between tactical troops and the Japanese government. If the Japanese are found to possess illegal swords or firearms, the Japanese police will be notified immediately. The occupation forces will not physically disarm any Japanese unless lives are endangered.

4. The Imperial Japanese Government will furnish a committee of expert sword appraisers who will inspect and classify all swords now in custody and to be surrendered. Operating under the policies set forth by the Supreme Commander for the Allied Powers (references 1a, 1b, 1c, and 1e above) this committee will select all swords of categories exempted by these policies and return them to their owners. The initiation of the inspection will be the responsibility of the local prefectural government which will contact the Home Ministry regarding the date on which the inspection will begin. The local military government units will exercise necessary surveillance

to assure that no unnecessary delays are occasioned.

5. Each exempted sword and hunting gun will be accompanied by a certificate (Appendix A. to reference 1f above) authorizing the owner to retain the weapon, the certificate being written in Japanese and English. These certificates will be made out in duplicate; the original to be given to the owner of the weapon, the duplicate to be placed on file with the prefectural ^{Government} certificate serial number. ~~Not subject to inspection at any time.~~ ^{Government} Military government units will report to his headquarters when the survey is completed within the area of their responsibility and the total number of swords and hunting guns authorized to be retained.

6. Certificates formerly issued by other agencies and now in possession of individuals who have retained swords and/or hunting guns will be replaced by the new form certificate. It is a function of the prefectural police to notify holders of the old certificates to submit them for replacement. Reacquisition of the right of possession of weapons now authorized is not contemplated.

7. Swords remaining after the exempted swords have been returned and all firearms not authorized for retention will be shipped to the Tokyo Ordnance Supply Depot, Akabana Station, Tokyo for final disposition. The packing of these weapons and delivery to the appropriate US Army rail transportation office for rail shipment or to the Tokyo Ordnance Supply Depot by truck shipment is a responsibility of the Japanese civil police. Their work in this matter will be supervised and controlled by the local military government unit. Separate instructions for the disposing of this stock of swords and firearms will be furnished the Commanding Officer, Tokyo Ordnance Supply Depot.

4 -

8. Retention of hunting guns will be in accordance with authority granted by paragraph 2a, SCAP radio, cite ZAX 5981 (Incl 2) and letter, this headquarters, dated 8 November 1945, AG 474 (IG), subject: "Permit for Hunting Guns." (Incl 3).
9. Caches or stocks of Japanese government-issued swords and/or firearms discovered by tactical troops will be disposed of by shipping them to Tokyo Ordnance Supply Depot without having them appraised by the Japanese committee. Weapons other than government-issued weapons discovered by any unit will be reported to the local military government unit.
10. A list of approved sword experts as proposed by the Imperial Japanese Government who are to serve as inspectors is attached as Inclosure No. 7.

2. Definitions.

a. Former Japanese armed forces are defined to be all Japanese land, sea and air forces, military and para-military organizations, formations or units and their auxiliaries, including Civilian Volunteer Corps and Kempei Tai Police forces wherever they may be found. This definition does not include Japanese civilian police force.

b. Enemy supplies and equipment are defined as all arms, ammunition, explosives, aircraft (both military and civilian), aviation and anti-aircraft equipment and devices, military impedimenta, stores and implements of war or other property used by or intended for use by the Japanese armed forces and Japanese controlled armed forces in connection with their military activities, to include all kinds of naval combatant and auxiliary vessels and craft, both surface and submarine, including those under repair, alteration or construction.

c. Military installations, facilities and establishments are defined as posts, camps, stations, cantonments, depots, airfields, seaplane bases, bases, arsenals, naval bases, ports, military research establishments, military or naval hospitals, clinics, dispensaries, medical supply dumps and depots, permanent and temporary land and coast fortifications, fortresses and other fortified areas, together with the plans and drawings of all such fortifications, installations and establishments. This definition does not normally include privately-owned installations and the property therein, such as aircraft and munitions factories, even though the entire output of end products of the factory were intended for use by the Japanese armed forces. Occupancy or use of

the installation by the Japanese armed forces at the time of surrender is considered basis for declaration as a military installation, subject to seizure and retention of the installation and its property.

3. Destruction of enemy supplies and equipment.

a. Enemy supplies and equipment which were essentially or exclusively for use in war or warlike exercises and which are not suitable for peacetime civilian uses will be promptly destroyed or scrapped, with specific exceptions stipulated in paragraph 4 below.

b. Corps commanders are charged with the destruction or other disposition of enemy supplies and equipment within their areas or zones of responsibility, except that Commanding General, IX Corps will not be responsible for disposition of Japanese ammunition at Ikego Ammunition Depot, Zushi, Kanagawa Prefecture. The Commander Naval Activities Japan is so charged in his respective areas or zones of responsibility.

c. As a general policy, enemy supplies and equipment will be destroyed or otherwise disposed of at the location at which turned over by the Japanese. In destroying enemy supplies and equipment, except ammunition and explosives, authority is granted to employ any practicable method of destruction which renders the supplies or equipment useless and beyond restoration by repair for its designed purposes. In destroying ammunition and explosives, the provisions of ordnance safety regulations will be adhered to. Japanese technical experts will be provided by this headquarters when requested and necessary to assist in the destruction of the materials, supplies and equipment. Inert projectiles, inert bombs and other inert ammunition components may be turned over in place to the Construction Board of the Japanese Government (Kensetsu-In) as scrap. Destruction of these items is not required.

d. Scrap resulting from the destruction of enemy supplies and equipment will be transferred to the Construction Board representatives of the Japanese Government as tonnages of copper, aluminum and iron products or other materials.

e. All military and civil aircraft, aircraft replacement parts, components and equipment including arament, bombs and missiles will be destroyed except those which the corps commanders believe merit special examination and those which they order secured and held for such examination.

f. All Japanese signal communications equipment of

2

strictly military types will be disassembled and component parts suitable only for military or naval use will be destroyed. Component parts suitable for peacetime civilian uses and not required for operational needs by the Occupation Forces will be returned to the Japanese Government.

(1) The Bureau of Communications has been designated as the agent for the Japanese Government in carrying out this program. It is desired that the Bureau of Communications in each area be required to assemble this equipment at disposition centers operated by corps commanders. The disassembly and destruction will be accomplished by the Japanese under supervision of Occupation Force personnel; however, assistance by the Occupation Forces may be authorized by corps commanders when necessary to accelerate the mission.

(2) Reclaimed component parts suitable for peacetime civilian use and scrap resulting from destruction of military type components will be released to the Construction Board in accord with paragraph 4b below.

(3) Common items such as telephones and standard teletypewriters will not be dismantled but will be returned to the Construction Board as found. Rendering this military equipment suitable for civilian use is an important phase in the restoration of the civil communications system.

g. Control will be taken of all Japanese and Japanese controlled aircraft communications, signal warning and detection, radio direction and range-finding systems and in general any other systems relating or accessory to the operation of aircraft. These systems and their equipment will be destroyed except those which the corps commanders order secured and held for special examination or for use by Occupation Forces.

h. Corps commanders will cause to be inventoried by Occupation Force personnel that enemy equipment which is to be destroyed.

i. The disposition of all technical items will be accomplished under close supervision of qualified personnel of the appropriate technical service concerned.

4. Enemy supplies, equipment and facilities returned to the

3

Japanese Government.

a. Enemy supplies and equipment not essentially or exclusively for use in war or warlike exercises, which are suitable for peacetime civilian uses and are not required for operational needs by the Occupational Forces, will be returned to the Japanese Government. This category of supplies and equipment consists in general of food; clothing; tentage; commercial type explosives which are readily available; merchant shipping; trucks or other types of vehicles or transportation equipment which can be used for civilian purposes; construction materials and machinery; drugs; medical supplies and equipment of any type; and communications equipment useful for civilian purposes (including radio transmitters, receivers and radio tubes not now installed but stored in supply dumps and warehouses).

b. The Construction Board (Kensetsu-In) has been designated as the official agency of the Japanese Government to receive all supplies, equipment, naval craft, facilities and installations which are to be returned to the Japanese Government. Details regarding the return of supplies, equipment, naval craft, facilities and installations to the Japanese Government will be arranged directly between the Occupation Force commanders and the Construction Board or its representatives, through local military government units.

c. Military installations as defined in paragraph 2c above, (including manufacturing plants and military research establishments) which are not required by the Occupation Force commanders and which are not under custody and control as directed by Operational Directive 21, this headquarters, 30 March 1948, subject: "Japanese Industrial Reparations Facilities", will be returned to the Japanese Government for use in peaceful pursuits. This property is to be used by the Japanese for the purpose of civilian relief, agricultural production, civilian housing, cultural and recreational activities, or for manufacture or research in connection with manufacture of goods of the types authorized by Directive 3, General Headquarters, Supreme Commander for the Allied Powers, 22 September 1945.

d. Authority to approve the release to the Japanese Government of installations referred to in paragraph 4c above, except as indicated in paragraph 4e below, is delegated to corps commanders. Improvements made to real property by Occupation Forces and materials and equipment thereon may be removed from the property before return to the Japanese upon determination that such action is economically feasible and necessary. Releases will be executed by local military government teams but only after

approval has been granted by corps commanders. Conversely, tactical troops will not execute releases without processing through the local military government team.

e. Installations referred to in paragraph 4c above and which were occupied by the Occupation Forces will be disposed of as follows:

- (1) Prior to vacating and releasing installations, tactical commanders will:
 - (a) Insure that they are properly safeguarded.
 - (b) Submit radio report to this headquarters, stating location of installation, major items of United States Government materials or equipment involved, recommended disposition and such other pertinent details as may be necessary.
 - (c) Notify local military government team of impending release.
- (2) Upon receipt of reports submitted in compliance with paragraph 4e (1) (b) above, this headquarters will direct disposition.
- (3) Units attached directly to Eighth Army will report installations to be vacated to this headquarters for disposition.
- (4) Provisions of this paragraph apply to all structures or facilities constructed entirely or essentially from United States Government materials and to existing structures or facilities materially improved by use of United States Government materials.

f. All airfields in Japan not required by Occupation Forces will be released as soon as practicable to the Japanese Government for cultivation purposes.

- (1) Prior to the release of any airfields mentioned above, approval will be obtained from this headquarters.
- (2) Release of airfields will be processed in the same manner as release of other facilities, as prescribed in paragraph 4g below.

(3) "Report of Airfield Destruction in Japan" (Reports Control Symbol F-5) will continue in effect as prescribed by letter, this headquarters, file AG 686 (FB), 24 April 1947, subject: "Airfield Destruction in Japan."

g. Receipt for release, OGA Form 1 (inclosure 2) completed in accordance with instructions contained thereon, will be executed by the local military government team for each installation released. The description of the installation will include information as to its former military use, total acreage and the number and types of buildings remaining when returned to the Japanese. The estimated value of any improvements made by the Occupation Forces remaining when the property is released to the Japanese will be entered in accordance with paragraph 5b of the instructions referred to above. Local military government teams will forward four (4) copies directed by paragraph 7 of the instructions, omitting the entry prescribed by paragraph 5a. Regional and district military government commanders will obtain the yen value required by paragraph 5a from the regional office of the Ministry of Finance, Bureau of State Property, located as follows:

Kinki	Osaka
Tokai-Hokurika	Nagoya
Kyushu	Kumamoto
Shikoku	Takamatsu
Chugoku	Hiroshima
Tohoku	Sendai
Hokkaido	Sapporo
Kanto	Tokyo

Three (3) completed copies will be forwarded to this headquarters. The copy designated for the Ministry of Finance will be released by the regional or district military government commander to the regional office of the Bureau of State Property. The release of demilitarized targets other than former military installations does not require forwarding OGA Form 1. Acknowledgment of such release by the Japanese Government will be filed in the records of the military government team in the prefecture where such property is located. Forwarding of OGA Form 1 does not require the making of corrections to yen evaluation added by the Ministry of Finance, Bureau of State Property. Forwarding indorsements will call to the attention of this headquarters instances where evaluation is obviously incorrect.

h. Transfers made in accordance with the policy stated in paragraph 4f above will not prejudice ultimate disposition of

6

titles and no agreements pertaining to determination of titles will be made.

1. Determination of title to property which may have been leased, confiscated or otherwise obtained by the Japanese armed forces prior to the occupation is not a function of this command. Occupancy or use by the Japanese armed forces of any installation defined in paragraph 2c above at the time of surrender is considered basis for retention or release as former military installations. The retention of enemy surrendered properties which are not former military installations as defined by paragraph 2c above must be accomplished by procurement demand. Privately-owned industrial installations, such as aircraft and munitions factories, while properly targets for demilitarization, will not be retained as former military installations.

j. Property released to the Japanese under the provisions of this directive and subsequently required by the Occupation Forces must be procured as prescribed in Operational Directive 33, this headquarters, 26 March 1946, subject: "Procurement of Japanese Supplies, Facilities and Services," as amended. Property thus procured is subject to monetary charge against the Occupation Forces.

k. Releases made prior to 1 February 1947 will not be voided solely on the basis of such releases having been made without accomplishment of OGA Form 1 as directed in paragraph 4f above. All releases made by Occupation Force units prior to 1 February 1947, unless specifically contrary to published directives current at the time of release, are hereby validated. Further use by Occupation Forces of property so released will only be accomplished under authorized procurement procedures. These releases have been reported and evaluated by the Japanese Government in compliance with memorandum for the Japanese Government, subject: "Evaluation of Military Installations Returned to the Japanese Government," (SCAPIN 1464), 14 January 1947.

l. Corps commanders will take immediate steps to turn over pistols and revolvers now on hand under their control or subsequently collected (except weapons of United States manufacture) to the local Japanese prefectural government for use by Japanese civil police force. Japanese police are authorized one pistol or revolver per each member of the civil police force.

m. Corps commanders are authorized to return to Japanese prefectural governments sufficient ammunition of appropriate type and quantity to insure that police of each prefecture have on hand

7

100 rounds of ball ammunition for each pistol on hand. Pistol ammunition in excess of above requirements will be shipped to Ikago Ammunition Depot, Zushi, Kanagawa Prefecture for storage.

n. Corps commanders are authorized to accept Japanese inventories of materials, supplies and equipment which are to be turned over to the Japanese Government and the transfer to the Construction Board may be based on these inventories.

o. All former United Nations naval craft, equipment and facilities found in Occupation areas will be seized and safeguarded pending further instructions. Report will be made to this headquarters of all craft so recovered, stating location and condition, together with the recommendation as to disposition.

p. The Commander Naval Forces, Far East has authorized the Maritime Bureau, Ministry of Transportation to transfer to the Construction Board all non-combatant ex-Navy small craft not now:

- (1) Employed by Allied Occupation Forces;
- (2) Required for repatriation work.
- (3) Required in minesweeping work.

q. Small craft are vessels less than one hundred (100) gross tons. Combatant small craft, including torpedo boats, torpedo launches and aircraft rescue boats, are specifically exempted from the above disposition.

r. In order to account properly for the transfer of the authorized craft from the Maritime Bureau to the Construction Board, transfer will be effected through military government teams, using the receipt form attached (inclosure 1). Upon receipt of this form, properly executed and signed by an official of the Construction Board, military government teams will release the Construction Board copy to the local representative thereof and forward completed copies to the other agencies listed at the bottom of the form. This will complete the transfer.

s. Other non-combatant small craft (formerly the property of the Japanese Army, Munitions Bureau or other government agency), which are released to the Construction Board, will be accounted for by military government teams, using the same receipt form used for ex-Navy craft (inclosure 1).

t. The Maritime Bureau, Ministry of Transportation has been assigned the responsibility of seeking out and identifying ex-Navy

small craft not yet in their custody. Any such craft found, in addition to craft presently in their custody, will be accounted for to military government teams on the receipt form attached, by either the Maritime Bureau or the local branch offices of the Ministry of Finance. In addition, craft previously transferred to the Construction Board by the Maritime Bureau through channels other than military government teams will be reported by that bureau for proper transfer through the execution of the attached receipt form.

u. The Economic Stabilization Board has at present local Economic Stabilization Bureaus in the field seeking out stocks of ex-Army supplies and equipment which were improperly transferred or disposed of, particularly during the period 14 August 1945 to 24 September 1945. Discoveries of such improperly transferred stocks will be reported by the local Economic Stabilization Bureaus to the Economic Stabilization Board as of the end of each month. The Board will forward these reports to this headquarters, requesting disposition instructions. Local Economic Stabilization Bureaus have been instructed to keep the prefectural military government teams in close contact with their discoveries and reports, requesting advice and assistance where necessary.

v. Upon receipt of the reports of improperly transferred stocks of ex-Army supplies and equipment, this headquarters will notify corps commanders of the disposition desired. It is anticipated that most of these transfers will involve large quantities of supplies, mostly in excess to the corps commander's requirements and as such, disposition will be considered on an Army-wide level. Once the stocks have been reported and disposition instructions issued to corps commanders, the actual disposition or destruction will follow the same procedure as if the supplies or equipment were originally discovered and seized by the Occupation Forces.

w. Military government unit commanders will establish a system of inspections to insure that arsenals, military laboratories and other installations having war potential capacity which are returned to the use of the Japanese and are not covered by existing directives are employed for the purpose set out in paragraph 4c above. Inspections of hospitals and sanitariums will insure that all civilians are accorded equal opportunity for hospital care and medical treatment and that preferential treatment to veterans and their families is prohibited.

5. Enemy supplies, equipment and facilities retained by Occupation Forces.

a. Enemy supplies and equipment determined by corps commanders or naval force commanders to be needed for operational needs may be retained and used by Occupation Forces. In addition to being drawn upon for the maintenance of the Occupation Forces, such supplies and equipment may be used for the maintenance of prisoners of war and displaced persons of the United Nations or for the relief of the local civilian population to the extent necessary to prevent or alleviate epidemics or serious disease and unrest or disorder which would endanger the Occupation Forces and the objectives of the Occupation.

b. Stocks of enemy supplies and equipment normally usable by Occupation Forces and in excess to corps commanders' requirements will be reported to this headquarters for disposition instructions. Types of supplies to be so reported include but are not limited to military and naval uniforms, clothing, textiles of all types and construction materials.

c. New or unique materiel, recommended for shipment to the United States for intelligence purposes, will be reported to this headquarters, giving nomenclature, description and shipping dimensions and weight.

d. Japanese Army equipment found in Navy areas and Japanese Navy equipment found in Army areas will be placed at the disposal of the appropriate Army and Navy commander concerned by the unit commander locating such equipment. After requirements of the interested services have been satisfied, mutual arrangements will be made between the Army and Navy commanders concerned for the destruction or other disposition of enemy supplies and equipment.

6. Records and reports.

a. Corps commanders will maintain complete records of all transactions pertaining to the receipt and disposition of enemy supplies and equipment, including signed receipts from Construction Board representatives (or, previously, the Home Ministry), covering the materials and supplies returned to the Japanese Government.

b. Prefectural military government teams are designated as the custodians of records compiled by tactical units operating in those prefectures relative to collection and disposition of enemy material, supplies and equipment, including inventories, receipts, reports and other documentary evidence of turn-over of such property. Receipts will be given to tactical units for all records received therefrom.

10

c. Commanders of all tactical units assigned or attached to corps will maintain records of operations by targets within each prefecture. As operations at each target are completed, all records pertaining thereto will be turned over to the military government teams responsible for that prefecture. Receipts for all records turned over to military government teams will be indorsed over to the corps commander concerned.

d. The Japanese Government has been directed to maintain records of the various supplies, materials and equipment turned over to its control, to show the receipt and the process of distribution, including final disposition of these items. These records are to be made available for inspection by Occupation Force commanders as required.

e. Consolidated reports covering disposition of seized or transferred Japanese supplies and equipment will be prepared and submitted to this headquarters by division commanders and General Officer Commanding British Commonwealth Occupation Forces on form as indicated on inclosure 3, "Report of Disposition of Captured or Surrendered Enemy Equipment and Supplies," (Report Control Symbol QGD-19). Reports from component divisions of a corps will not be consolidated by corps. Preparation of reports will be as follows:

(1) Item, balance remaining on hand from previous period, quantity received, quantity disposed of, the method of disposition and balance on hand of all Japanese supplies and equipment which are seized. In this connection:

(a) Care will be exercised in the use of proper nomenclature and identification of unit of count or unit of measure. Units of measure other than each or piece will be expressed in United States standard units of measure (except that in reporting medicines and narcotics, the standard pharmaceutical measure will be used). Capacities of containers will be indicated. Tonnages will be expressed in terms of short tons (2000 pounds).

(b) If more than one method of disposition is used, quantities disposed of by each method will be indicated.

(c) Where large balances of supplies and

equipment remain on hand at the end of each reporting period, reports will include a statement justifying reasons therefor.

- (2) Each service will submit a separate report as indicated in inclosure 3. Meteorological equipment will be reported by the signal section as a portion of its consolidated report. Narcotics will be reported by medical section as a portion of its consolidated report but will be made on separate sheets.
- (3) Reports will be rendered monthly, closing at 2400 hours on the last day of each month.
- (4) Scrap metals accruing from destruction of materiel and returned to the Japanese during the period covered by the report will be shown as estimated tonnages of copper, aluminum, iron or other scrap metals. Each type of metal will be listed separately.
- (5) Reports prescribed above will include only those transactions accomplished during the period covered by the report.

f. Attention is directed to provisions of Circular 124, this headquarters, 24 July 1947, subject: "Disposition of Japanese Procured and/or Surrendered or Captured Property Which has been Accounted for as PC&S Property." When items of ex-Japanese army or navy property, equipment or facilities are returned to the Japanese Government under the provisions of this circular, the next "Monthly Report of Captured or Surrendered Enemy Equipment and Supplies" will show these returns, using the disposition symbol "O/RJ" in column 6 of the report. This is to show that the item had originally been reported as "Used for Operation (O)" and then subsequently "Returned to Japanese (RJ)." All entries of such a nature will be listed on the report as a separate portion of each technical service's section, apart from the routine entries.

g. In addition to the foregoing, a monthly report will be submitted to this headquarters giving information as outlined on attached form (inclosure 4), "Monthly Report of Disposal of Japanese Ammunition and Explosives," (Reports Control Symbol O-11).

- (1) The period of the report will close at 2400 hours on the last day of each calendar month.

12

- (2) The report will be submitted by telephone directly to the Ordnance Officer of this headquarters or by radio by 1200 hours on the first day of each month. Information will be of a general and informative nature. Telephone or radio reports will refer to column numbers in transmitting desired information.

- (3) Under column 9 (Remarks) will be included the following:

- (a) Total tonnage remaining in corps area, by classification listed in explanatory note on reverse side of inclosure 4.
- (b) Estimated date of completion of operations in corps area.
- (c) Other pertinent or informative data, such as accidents, etc.

7. Rescissions.

a. Operational Directive 28, this headquarters, 18 November 1945, as amended, is rescinded.

b. Operational Directive 4, this headquarters, 11 January 1946, as amended, is rescinded.

Note 1. In column (1):

a. Items will be arranged alphabetically

b. Entries in this column should be sufficiently complete to identify the item; thus entries such as "boat" or "miscellaneous" should be avoided.

c. Only such items which were involved in transactions during the period of the report need be entered; that is, items which involve entries in columns (3), (4), (5), (6) or (7).

Note 2. In column (2):

a. Enter unit of measure in United States standard units. (Refer to par 6e (1), O/D 25.

Note 3. In column (3), enter the quantity on hand at the start of the period. This quantity should be the same as the quantity on hand at the end of the preceding period. Cumulative quantities should not be shown.

Note 4. In column (4), enter the quantity received during the period covered by the report.

Note 5. In Column (5), enter the quantity disposed of during the period.

Note 6. In column (6), indicate the method of disposition, using the following symbols:

- D - Destroyed
- O - Used for Operations
- RJ - Returned to Japanese
- S - Scrapped (meaning that item has been reduced to scrap which will be returned to the Japanese and reported as such)
- TIT - Trophies issued to troops
- O/RJ - Originally reported as "O" but subsequently returned to Japanese

Note 7. In column (7), enter the quantity on hand at end of period covered by the report. Columns (3) + (4) - (5) = (7)

Note 9. Remarks required by any special situation or condition will be referred to on additional sheets attached to this report.

To: Supreme Commander for Allied Powers
 From: Supreme Court
 Subject: Materials, Supplies, and Equipment to be turned over to the Japanese Government by Allied Forces
 Date: Oct. 20, 1949

Recently an inquiry from a judge of Tokyo District Court was received by the Chief of Liaison Section, General Secretariat, Supreme Court to the effect that as he has come to entertain a doubt about the interpretation of the SCAP Memorandum for the Japanese Government dated Oct. 16, 1945, subject, "Memorandum concerning Materials, Supplies, and Equipment to be turned over to the Imperial Japanese Government by Allied Forces", he wishes to know the opinions thereon of Occupation Forces authorities. So we hereby beg to ask you to kindly let us know the interpretation of the issuing authorities thereon in accordance with Para. 4, Directive Number 2 dated Sep. 3, 1945.

Oct. , 1949

From: SHIRAKAWA Rokurō, Presiding Judge, Judge of 4th Criminal Affairs Division, Tokyo District Court.
To: HIGUCHI Masaru, Chief, Liaison Section, General Secretariat, Supreme Court.
Subject: About SCAP Memorandum to be applicable to scrap from implements of war destroyed which is to be returned to the Japanese Government by Allied Forces.

Regarding the above as we have come to entertain the following doubts, we hereby beg to ask you to kindly take the trouble to let us know the opinions thereon of the Occupation Forces authorities concerned:

- I. May we understand that the terms "the subject material, supplies, and equipment" mentioned in Paras. 2 and 4 of the SCAP Memorandum for the Imperial Japanese Government dated Oct. 16, 1945, subject, "Memorandum concerning Materials, Supplies, and Equipment to be Turned Over to the Imperial Japanese Government by Allied Forces"
- (1) are the same in their import as the terms "equipment, (excluding that on small scale) essential supplies and materials" mentioned in Para. 1 of the Japanese Government memorandum for G.H.Q., SCAP (file No. 219) dated Oct. 10, 1945, of which receipt has been acknowledged in Para. 1 of the above SCAP Memorandum?
 - (2) are the same in their import as the terms "such supplies, materials and equipment of the Japanese armed forces as are being returned to your control" mentioned in Para. 3 of the SCAP Memorandum for the Imperial Japanese Government dated Sep. 24, 1945, subject, "Memo-

randum concerning Materials, Supplies and Equipment Received and to be Received from the Japanese Armed Forces"?

- (3) are the same in their import as the terms "equipment and supplies of the Japanese armed forces which are not essentially for war or warlike exercises, including scrap from implements of war destroyed" mentioned in Para. 2 of the above SCAP Memorandum dated Sep. 24? (Is there any specific meaning involved in the omission of the term "material" therein?)

Why the terms "including scrap from implements of war destroyed" which are found in the above sentence are omitted to be mentioned in either of Paras. 2 and 4 of the above-quoted Oct. 16 dated Memorandum?)

- II. The SCAP Memorandum for the Japanese Government dated May 25, 1948, subject, "Memorandum concerning Dissolution of the Arms Disposal Committee" quotes in its Para. 1 the above Memorandum dated Sep. 24 as the one to which the reference is to be made, but not the said Memorandum dated Oct. 16. Is this due to that the Memorandum dated Oct. 16 has no connection with the Arms Disposal Committee?
- III. Does the term "proceeds" of the sentence mentioned in Para. 4 of the above Oct. 16 dated Memorandum mean either "gross proceeds" or "net proceeds"?

Memorandum concerning Materials, Supplies and Equipment Received and to be Received from the Japanese Armed Forces.

24 Sept. 1945

1. In furtherance of paragraph VI, General Order No. 1, this headquarters, dated 2 September 1945, it is desired that the Imperial Japanese Government take immediate steps to prepare to turn over on demand to the Commanding Generals, Sixth and Fifth United States Armies, XXIV Corps, and Commanders, Fifth and Seventh Fleets, all arms, ammunition, explosives, military equipment, stores, and supplies and other implements of war of all kinds and any equipment or other property belonging to used by, or intended for use by the Japanese armed forces or any members thereof in connection with their operations. Japanese armed forces include all Japanese and Japanese-controlled land, sea, and air forces and military and para-military organizations, formations, or units and their auxiliaries including Civilian Volunteer Corps wherever they may be located.

2. United States Occupation Force Commanders have been directed to destroy all equipment which is essentially or exclusively for used in war or warlike exercises and which is not suitable for peacetime civilian uses. After operational requirements of the Occupation Forces have been met, equipment and supplies of the Japanese armed forces which are not essentially for war or warlike exercises, including scrap from implements of war destroyed, are to be returned to the Japanese Government except that in Korea.

3. The Home Ministry of the Imperial Japanese Government is hereby designated as the official agency to receive and account for such supplies, materials and equipment of the Japanese armed forces

as are being returned to your control.

4. In order to administer these transactions, it is desired that the Imperial Japanese Government take the following action:

a. Responsible Japanese Army and Navy Commanders will prepare inventories by location (generally corresponding to points at which the material is being assembled for turning over to the United States Occupation Forces) of all supplies, materials, and equipment in their possessions. These inventories will be made available upon call to United States Occupation Force Commanders.

b. The Home Ministry of the Imperial Japanese Government will send representatives to the Commanding Generals, Sixth and Eighth United States Armies, and Commander, Fifth Fleet, for the purpose of receiving supplies, materials, and equipment being returned to the Japanese Government. Sufficient personnel will be provided to accept these items at the locations where turned over by the Japanese armed forces.

c. The Home Ministry of the Imperial Japanese Government maintain records of all property so received and account for this property in such form that the disposition of all supplies, materials, and equipment may be traced to the ultimate consumer. These records will be made available on call to the Supreme Commander for the Allied Powers, the United States Occupation Force Commanders, or authorized representatives.

5. You are informed that the supplies, materials, and equipment returned to your Government are for the purpose of civilian relief, and for use toward restoration of Japanese civil economy to the extent that it can provide the essentials of food, clothing, and shelter for the Japanese civilian population. The use of these supplies, materials, and equipment for any other purposes than the above is expressly forbidden.

C.L.O. No.219

10 October 1945

An Outline of the Disposal of the Special Articles To Be Turned Over By Allied Forces

(1) The central authorities will concern themselves exclusively with the disposal of equipment, (excluding that on small scale) essential supplies and materials, leaving small items and details to local authorities, who are to act under general directions issued by the central authorities.

Included in the category of essential supplies and materials are; staple food (rice, wheat, flour, miscellaneous cereals), certain specified foodstuffs, salt, clothing, timber, medical supplies including hygienic materials, and motor vehicles. The central authorities are to decide the disposal of these supplies and materials and will take immediate and concrete measures.

(2) In order to carry out the distribution smoothly and correctly a Special Committee will be created at each Prefectural Government, which with the Governor as chairman ex-officio, will consist of representatives from the Governmental departments concerned as well as private persons of experience.

As an initial step the local authorities will be instructed to dispose immediately of foodstuff other than staple foods and certain specified foodstuffs and sundry articles for domestic use.

(3) The distribution will be governed by policies set forth by the Allied Supreme Headquarters and particular emphasis will be laid on the following points:

- a. Relief for war victims, bereaved families and repatriated civil and military personnel.
- b. Maintenance and increase of the production of foodstuffs.
- c. Medical aid and treatment.
- d. Rehabilitation of the communication and transportation net work.
- e. Vocational guidance and educational facilities.

(4) Articles distributed to state or public bodies as well as to war victims and other persons entitled to special consideration, will be given free of charge, while the general public will be charged current official prices. Proceeds of such sales will, as a general rule, be contributed to the stabilization of livelihood of the people.

(5) The relief supplies will be held for civil and military repatriates up to the end of March, 1946. As for those who will be repatriated afterwards the Government will undertake to provide them from other sources of supplies. The staple foods, however, will be dealt differently.

Memorandum concerning Materials, Supplies, and Equipment to be Turned Over to the Imperial Japanese Government by Allied Forces.

16 Oct 1945.

1. Receipt is acknowledged of your memorandum, file number 219, same subject, dated 10 October 1945.

2. All policies relating to the subject material, supplies, and equipment are to be formulated on the basis of, (1) alleviating suffering and starvation, (2) restoration of the production and distribution of foodstuffs, (3) production of consumer goods and (4) the restoration of other civilian economy, mentioned in the order of priority.

3. The use of existing civilian channels in the distribution of these materials, supplies and equipment is satisfactory and is approved.

4. It is to be clearly understood that proceeds from the sale of any of the subject material, supplies, and equipment are to go to public (governmental) funds and are to be used solely for the relief of the civilian population. Detail record are to be kept which will clearly indicate not only the disposition of all items turned over to be Imperial Japanese Government but also disposition of funds which accrue from the sale of any of these items.

5. The program as submitted does not reflect adequate provision for holding stocks of staple food, clothing and medicine for distribution as direct relief in the future. It is recognized that need for all three materials currently exists throughout Japan. It is felt, however, that the need will be much more urgent and widespread in the late winter months of February, March and April. As the only known reserve for this critical period, these stocks of food, clothing, and medicines must be carefully husbanded.

The exact time and place of greatest need, requiring use of these stocks, is to be determined by the Japanese Government giving full consideration to the objective that the stocks provide relief to the maximum number of Japanese civilians.

6. It is noted that the term "military repatriates" is used. With the complete demobilization of the Japanese Armed Forces, this headquarters recognizes no such group of "ex-military" personnel. The stocks in question are to be distributed to Japanese civilians. Included in the term "civilians" are, of course, demobilized military personnel, however distribution for relief is to be based on current need of the individual and in no case is any consideration to be given to the prior status of such individuals.

7. Under the items of particular emphasis listed in paragraph (3), a page of your memorandum, should be the construction of emergency housing. Maximum utilization must be made of building materials of all kinds for emergency housing in devastated areas.

8. Nothing in this letter is to be construed in such a manner as to prohibit the immediate disposal by the most expeditious means of any foodstuffs which are in danger of spoiling or becoming otherwise unfit for human consumption. Aggressive action to prevent such waste is directed. Retention of stocks for future distribution for civilian relief is to be limited to those which can be stored for the required time without serious deterioration.

9. The Imperial Japanese Government will take the necessary steps to provide adequate protection and maintenance for all stocks of supplies, materials and equipment received under the provisions of this program until final disposition of such stocks is made.

10. Subject to the provisions outlined in the foregoing paragraphs, authority is granted to initiate immediately distribution of the subject supplies, equipment and materials. As a matter of record, a revised program reflecting the indicated changes will be submitted to this headquarters without delay.

c. To take all supplies, material, equipment, books, accounts, records, documents and other property now in the custody of, or under the control of, the Arms Disposal Committee or of any other committee or agency dissolved pursuant to sub-paragraph 3 a, above, into custody under the direction and exclusive control of the Procurator General's office until further notice.

d. To make available to the Procurator General's Office for examination and inspection all the books, accounts, records and other papers of the affiliated companies or organizations comprising the Arms Disposal Committee.

4. The Industrial Recovery Corporation is designated as the responsible agency to receive, account for, and distribute the following:

a. All supplies, material, or equipment taken into custody by action authorized in 3c, and released from the Procurator General's Office for the rehabilitation of the civilian economy of Japan or for any other program of the Japanese Government pursuant to or in compliance with reference memorandum 1 c.

b. All materials of the same type as formerly handled by the Arms Disposal Committee released by the Occupation Forces to the Construction Board.

5. The Industrial Recovery Corporation will report all actions in compliance with paragraphs 4 a and 4 b above to General Headquarters, Supreme Commander for the Allied Powers.

6. Direct communication between the responsible agency of the Japanese Government and the Economic and Scientific Section of General Headquarters, Supreme Commander for the Allied Powers is hereby authorized to implement this memorandum.

"Disposition of Japanese Procured and/or
Surrendered or Captured Property."

d. Letter, Headquarters Eighth Army,
AGCM 602, 20 February 1950, subject: "Additional
Instructions to Implement Real Estate Policy
for Japan."

2. The following supplemental instructions
to reference 1a govern the collection and
disposition of supplies, equipment, naval
craft, facilities and installations formerly
belonging to the Japanese armed forces.

3. For the purpose of implementing
this directive during the present emergency,
the term "occupation force commanders" includes:

- 2 -
General Officer Commanding, British
Commonwealth Occupation Forces

Commanding General, Northern Command

Commanding General, Southwestern
Command

Commanding Officer, Yokohama Command

4. Occupation force commanders, are
charged with the destruction, demilitariza-
tion, or disposition of enemy supplies and
equipment within their areas or zones of
responsibility, except that the Commanding
Officer, Yokohama Command, is relieved of
the responsibility for disposition of
Japanese ammunition at Ikego Ammunition
Depot, Zushi, Kanagawa Prefecture.

5. Destruction, demilitarization or
other disposition of supplies and equipment,
except unique and new development items
desired for examination, intelligence and
research, may be effected at the discretion
of commanders concerned without further
reference to this headquarters. These items
collected for intelligence purposes will be
reported to this headquarters for disposition
instructions, giving nomenclature, descrip-
tion, shipping dimensions and weight.
Requests for specific items for which there
may be an operational need, but not available
to one command, may be requested from another
command. Such items will be transferred to
the requesting agency when available.

6. Military installations, facilities,
and establishment determined to be excess
under the provisions of reference 1b, will
be reported to this headquarters for dis-
position. Final releases will not be
effected except by authority of this head-
quarters. Property not previously utilized
by the occupation forces and property directed
for release by higher headquarters will

be released on a temporary basis, pending completion of final record action. Property utilized by the occupation forces, but now excess to local requirements, may be released on a temporary basis pending final instructions and record action from this headquarters. Reports of excess real property will be submitted on Engineer Form 1266 (Real Property Record) Part D (Report of Excess). Instructions for disposition of real property will be issued by this headquarters on Engineer Provisional Form D-1. Real property released to the Japanese Government is to be used for peacetime pursuits, e.g., civilian relief, agricultural production, civilian housing, cultural and recreational activities, or for manufacture or research essential to the Japanese economy.

7. Receipt for real estate release, OGA Form 1 (Release of Former Japanese Military and Naval Installation), inclosure 1, will be executed by the regional post commander for each installation released. The description of the installation will include information as to its former military use, complete address, total acreage, and the number and types of buildings remaining when returned to the Japanese. Areas and structures reported as excess will be clearly identified on a sketch or plot plan. The total estimated value of any improvements made by the occupation forces remaining when the property is released to the Japanese will be entered in accordance with paragraph 5b of the instructions on OGA Form 1. Regional post commanders will obtain the yen value from the regional office of the Ministry of Finance, Bureau of State Property, located as follows:

<u>Regional Office</u>	<u>Location</u>
Kinki	Osaka
Tokai-Hokuriku	Nagoya

Kyushu	Kumamoto
Shikoku	Takamatsu
Chugoku	Hiroshima
Tohoku	Sendai
Hokkaido	Sapporo
Kanto	Tokyo

The release of demilitarized targets other than former military installations does not require forwarding OGA Form 1. Acknowledgement of release issued by the Japanese Government will be filed by the regional post commander of the area where such property is located. Forwarding indorsements on OGA Form 1 will call to the attention of this headquarters corrections to yen evaluation added by the Ministry of Finance, Bureau of State Property, and instances when evaluation is obviously incorrect.

8. Determination of title to property which may have been leased, confiscated, or otherwise obtained by the Japanese armed forces prior to the occupation is not a function of this command. When ownership becomes a matter for determination, requests will be forwarded to General Headquarters, Supreme Commander for the Allied Powers, through this headquarters. Information available from local records to indicate previous ownership, occupancy, use, charts, titles, transfers, and Japanese official statements will be forwarded with the request for search of title. Privately owned industrial installations, such as aircraft and munitions factories, while properly targets for demilitarization, will not be retained as former military installations. Releases effected in accordance with paragraph 6 will not prejudice ultimate disposition of titles and no agreements pertaining to determination of titles will be made.

9. Property released to the Japanese Government under the provisions of this directive and subsequently required by the occupation forces will be obtained by procurement demand. Payments are not required for property owned by the Japanese Government.

10. Releases made prior to 1 February 1947 will not be voided solely on the basis that such releases were made without accomplishment of OGA Form 1 as directed in paragraph 6. Releases made by occupation force units prior to 1 February 1947, unless specifically contrary to published directives current at the time of release, are hereby validated. Further use by occupation forces of property so released will only be accomplished under authorized procurement procedures.

11. Occupation force commanders will ensure that arsenals, military laboratories, and other installations having war potential capacity, which are returned to the use of the Japanese, are employed for peacetime pursuits set forth in paragraph 6.

12. Occupation force commanders will designate custodians of records and will maintain complete records of transactions pertaining to the collection and disposition of supplies and equipment to include inventories, receipts, reports, and other documentary evidence of collection, destruction, or transfer of such properties. These records will not be destroyed without the approval of this headquarters.

13. Occupation force commanders will prepare and submit (semiannually, closing at 2400 on 30 June and 31 December) consolidated reports (Report of Disposition of Japanese Military Equipment, Reports Control Symbol QGD-19 (R27) covering disposition of seized or transferred Japanese supplies and equipment, except explosive ordnance, to this headquarters, attention: Assistant Chief of Staff G-4, as prescribed in inclosure 1 to reference 1a. (AGG 400.7)

Office of the Commanding General
APO 343

11 June 1951

OPERATIONAL DIRECTIVE)

NUMBER 2/1 for 1950)

COLLECTION AND DISPOSITION OF SUPPLIES,
EQUIPMENT, FACILITIES, AND INSTALLATIONS
FORMERLY BELONGING TO THE JAPANESE ARMED
FORCES

Paragraph 8, Operational Directive 2, this headquarters,
25 September 1950, is amended to read:

"8. Determination of title to property which may have been leased, confiscated, or otherwise obtained by the Japanese armed forces prior to the occupation is a function of the Japanese government, subject to final review by this headquarters. When ownership of nonenemy owned property becomes a matter for determination, requests will be forwarded to General Headquarters, Supreme Commander for the Allied Powers, through this headquarters. Information available from local records indicating previous ownership, occupancy, use, charts, titles, transfers, and Japanese official statements will be forwarded with the request for search of title. Privately owned industrial installations, such as aircraft and munitions factories, while properly targets for demilitarization, will not be retained as former military installations. Releases effected in accordance with paragraph 6 will not prejudice ultimate disposition of titles and no agreements pertaining to determination of titles will be made."
