MOJI CITY HALL
Moji, Kyushu, Japan

July 14th, 1951

SUBJECT: Petition re: Emergency and Urgent Arrangement
of Port & Harbor Facilities in Tano-ura Section,
Moji Port.

TO: See Distribution

Gentlemen:

It goes without saying that the Port of Moji is the only international relaying port in the west half of Japan with properly designed facilities and with vast back-ground behind it governing entire Kyushu and part of Honshu and Shikoku.

And, now that the safe-port declaration pronounced in 1949 and with the reopening of commercial foreign trade, import and export business, a remarkable progress in port activities at Moji has been observed, and the vessels coming in to and going out of this port had been very rapidly increasing in number, until when the Korean Incident broke out last Summer. Almost automatically (because of its geographical situation), this port was selected by US Army and most of the port facilities such as berthing buoys and/or mooring pier space, became to be under Army's control and utilized by the UN Forces.

It is true that we feel so much honored with the fact that we are taking some part in our contribution to the UN Forces as one of the links of its activities by offering such facilities. However, the limited berthing facilities is presently restricting the development of the economy of the city of Moji as our city is basically dependent on the shipping activity brought to this port. We do not have other large industries to provide employment as found in most cities in Japan. So little capacity of berthing and mooring spaces left for commercial use have caused ships go to some other ports although they do not pay off with respect to economical operation. The attached appendix shows a list of ship that were diverted from Moji during the period of April to June of this year. So, we cannot but say that if this situation goes along as it is now, it will be a great disadvantage to the progress of industry and economy of Japan which is just recovering its

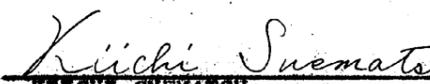

strength after the War as well as to Moji City itself. It is urgently desired, therefore, to have Moji Port re-arranged by the only means of repairing and re-constructing Tano-ura Section of the Port as scheduled. This schedule has been planned by the respective Government authorities because of the geographical significance of Moji. And as a matter of fact, the project was started in 1941 without any result due to shortage of funds. However, the requirement has been growing day by day, and no matter how long the main facilities be procured by US Army or even if they are released to us for Japanese ships' use soon, this project is indispensable for the betterment of overall port activities in future after the Peace Treaty, when it is expected there will be more advance in foreign trade by rapid strides. We are confident that Japan's future industry and economy will depend directly upon whether this project will be successfully completed or not.

We, representing all circles of Moji City and conveying their zeal and enthusiasm to you to consider this matter and return your favor to us.

We are also inclosing several lists showing various figures which we hope to help you refer to.

Yours very truly,

SHINGO NAKANO
Mayor, Moji City

KIICHI SUEMATSU
Chairman, Moji City Assembly

TEIZO KIMURA
President
Chamber of Commerce & Industry

HEADQUARTERS
MOJI PORT
8156TH ARMY UNIT

- Copy -

EAJ/md
17 July 1951

CC

The Honorable Shingo Nakano
Mayor,
City of Moji

Dear Sir:

Have read with interest your proposed plan for harbor improvement in Moji Port.

The personnel of Moji Port, 8156th Army Unit are aware that this Port does not presently offer sufficient berthing facilities to meet the demand of both military and commercial shipping. Also, as you state, if the military were not using a portion of the Port facilities, you would still be unable to meet the commercial requirements, as demonstrated by the number of ships diverted from this Port due to lack of berthing facilities.

Moji is truly a city that is economically based on its shipping industry and its development is dependent on the city's ability to accommodate increased shipping by the construction of additional wharves and terminals.

It appears that this project is one that is sound and should be given every consideration by government officials, as a measure that will benefit, not only Moji City but will contribute, largely, to the nation's economy.

Sincerely,

F.E. BRUEN
Colonel, TC
Commanding

Appendix No. 2

CAPACITY OF HANDLING CARGO AT THE TANOURA HARBOR
AFTER COMPLETION OF THE PROJECT

NAME	DEPTH OF WATER	LENGTH	CAPACITY PER TON		CAPACITY
			TON	TON	
HOME - 3 metre pier	- 3.5	170 m	400		68,000
ABROAD - 9 metre pier	- 9	350 m	800		280,000
HOME - 4.5 metre pier	- 4.5	520 m	700		264,000
					712,000

APPENDIX #3

MOJI PORT CARGO HANDLING CAPACITY
PRESENTLY AVAILABLE

Catego- ry	Berth	Depth (in meter)	Pier Length (in meter)	Cargo Handling Capacity at		Standard (Basic)		REMARKS
				Present per 1 mtr per year	Yearly per 1 mtr per year	Cargo Handling Capacity	per 1 mtr per year	
F	Customs Pier	10 mtr maximum	1,327	(Unit Ton)	180.0	(Unit ton)	800	Held by US Army. Some special commer- cial cargoes, when authorized by Army, handled at these piers. Same as above.
F	Sotokama Pier (Pier #10&11)	9 max.	345	138.0	800	276.0		
J	Barge Pool including inner side of Pier #10 & 11.	1.8-3.6	1,912	697.8	350	669.2		150 mtr long pier space of this section w/ draft of 3.6 mtr procured by US Army.
J	Small crafts pool east of Customs Pier	2.4 max.	602	0	0	0		Cargo handling impossible due to bldgs along side waterline.
J	Kuzusha Section	3.6 max.	836	275.8	400	334.4		Background on shore being coal year and/or com- mercial whse, not very practicable.
J	Kemerie Section	1.8 max.	716	250.6	300	214.8		Partly not use- ble - sand accumulated.

RH'-0017

Gate- Berth ory	Draft (in meter)	Pier Length (Mtr)	Quantity of Cargo Handled to be handl- ed		REMARKS
			per 1 meter yearly	Basic Qty per 1 meter yearly	
J. Dairi Section	1.8 max.	221	280	61.8 300	66.3 Partly not usable as sand accumulated and too shallow.
J. Japan Flour Mill & Japan Sugar Refinery Mill Section	1-3.3	451	225	96.9 300	129.3 Not deep enough.
J. TANO-URA Section	2.1-3.5	396	320	123.5 250	96.5 No facilities, No breakwaters at present.
TOTAL				1,824.4	2,848.1

Legend: F - Foreign Vessels
J - Japanese Vessels

NOTE: "Qty handled yearly" and "Basic Quantity Handled Yearly" are both shown with one thousand ton (1,000 ton) as the unit figure, thus 180.0 is 180,000 ton.

Standard for Basic) Qty is national standard mark as prescribed by the Govern-
ment. In most cases, this standard is not achieved due to lack of facilities
except Customs Pier and Sotohama Pier which are procured by the Army now in Moji.
TANO-URA Section is the only area available with much room for betterment.

2

APPENDIX #4

ACTUAL AMOUNT OF CARGO HANDLED
Jan - Apr 1951 at Moji Port

Month	Amount Handled		Handled off coast by alongside piers(90%)		REMARKS
	Outgoing TON	Incoming TON	Total TON	TON	
Jan.	117,607	93,593	211,200	21,120	190,080 Increasing month by month.
Feb.	147,813	88,212	236,025	23,602	212,423
Mar.	139,517	206,936	346,453	34,645	311,807
Apr.	156,670	182,485	339,155	33,915	305,239
TOTAL	561,607	571,226	1,132,833	113,282	1,019,551

COMPARISON BETWEEN ACTUAL AMOUNT HANDLED (as
above) AND PRESENTLY AVAILABLE CAPACITY

Actual amount handled (A)	Gargo Handling Capacity Presently available Amount (B)	Short(A-B)	Basic Capacity Amount (C)	Short(A-C)	REMARKS
Monthly average Jan - Apr 51.	254,887	152,030	102,857	237,341	17,546
					Basic Capacity includes Customs Pier & Sotohama Pier (Pier #10 & 11) which are used by ARMY NOW.

NOTE: As shown above, in spite of apparent shortage of capacity, there are so much
amount of cargo overhandled at this Port. In 1950, approx. 700,000 tons of cargo
overhandled, and the monthly average of the first four months of 1951 runs twice
as much as the capacity. Everybody concerned in Moji is endeavouring to accom-
plish the task by any means such as 24 hours a day work, unreasonably high wage
for stevedores, etc. In the past, the record shows exceptionally large figure
handled in 1935, but it was done only under the pressure of military (Japanese)
without any regard to proper maintenance of facilities and with slavish manpower,
so this record cannot be referred to at all for future program.

APPENDIX #5

COMPARISON BETWEEN THE MARKED AMOUNT BY 3-YEAR SYNTHETIC STATE DEVELOPMENT PROGRAM AND THE PRESENT CAPACITY OF CARGO HANDLING AT MOJI PORT

Yr.	Marked Qnty of the 3-year Program (A) Ton	Present Capacity		Basic Capacity		REMARKS
		(Less Procured Piers) (B) Ton	Short- age (A - B) Ton	Amount (C) Ton	Short- age (A-C) Ton	
1951	2,865,600	1,824,400	1,041,200	2,848,100	17,500	Figures in sum (A) is based on the next list.
1952	3,755,700	1,824,400	1,931,300	2,848,100	907,800	
1953	4,824,000	1,824,400	2,999,600	2,848,100	1,975,900	

BREAK-DOWN OF 3-YEAR STATE PROGRAM'S MARK

Yr.	Marked Qnty Ton	Qnty handled		REMARKS
		off-shore (by barges) 10% Ton	* Qnty handled alongside piers 90% Ton	
1951	3,184,000	318,400	2,865,600	*Percentage is estimated. Marked Qnty" as shown in the above list is this.
1952	4,173,000	417,300	3,755,700	
1953	5,360,000	536,000	4,824,000	

NOTE: As shown above, this emergency project of betterment of Fano-ura Section is indispensable no matter if US Army still use these piers presently procured or not, since the absolute shortage of capacity is unconditional.

APPENDIX #6

BERTHING AND MOORING FACILITIES AT MOJI PORT
(Average Daily Laying Up Capacity)

AREA	No. of Ship	Nominal Capacity		Actual Capacity		Operational Capacity		Present Commercial Use Capacity	
		Tonnage	Ship	Tonnage	Ship	Tonnage	Ship	Tonnage	Ship
A Section	11(11-800)	8,800	11	8,800	5,280	2(2-800)	1,600

Buoys	8(1-15,000) (2-10,000) (3-8,000) (1-6,000) (1-4,000)	69,000	8	8(8-7,000)56,000	60%	33,600	5(1-4,000) (4-7,000)	32,000	
TOTAL:	40	195,000	40	151,800	60%	91,080	18	57,600	

* Note: - Operational Capacity 60% is figured with following in mind:
10 hrs per day under Custom's jurisdiction.
3 hrs per day shifting stevedore gangs
3 days as average laying up in the port area each ship.
30% shifting

Appendix No. 7

VESSEL REQUIRED FOR HANDLE CARGO ON SYNTHETIC STATE DEVELOPMENT PROGRAM

Year	Handle cargo in 1 year	Max. handle cargo per month	Vessel required per month	Vessel required per day
1951	3,184,000 tons	350,240 tons	2,773,000 tons	92,463 tons
1952	4,173,000 "	459,030 "	3,635,510 "	121,183 "
1953	5,360,000 "	589,600 "	4,875,000 "	155,833 "
	Expected handle cargo in Synthetic state 3 years program	(A) x 10 %	Gross ton .. 160% cargo load & unload cargo	Average per day per month

MONTHLY LIST FOR HANDLE CARGO

Month	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Monthly %	7%	8%	7%	8%	8%	7%	8%	7%	9%	10%	11%	10%

The above figure indicates real handle cargo from 1948 to 1950

Appendix No. 8

COMPARISON BETWEEN EXPECTED HANDLE CARGO ON SYNTHETIC STATE DEVELOPMENT PROGRAM AND PRESENT CAPACITY

Year	Comparison between present capacity & the program		Present comparison (include procured capacity by U.S. Army)	
	Actual capacity	Required Tonnage	Capacity used for Civil Trade	Required tonnage in Development program
1951	91,080 Ton	92,465 Ton	57,600 Ton	92,463 Ton
1952	91,080	121,183	57,600	121,183
1953	91,080	155,833	57,600	155,833

As the above figure indicates shortage of berth and mooring facility will be 34,000 tons and shortage of these on the Development Program will be 98,000 tons.

LIST OF CIVIL VESSELS TOUCHED THE MOJI PORT

DATE	March		April		May	
	No. of vessel	Tonnage	No. of vessel	Tonnage	No. of vessel	Tonnage
1	19	59,016	16	55,134	17	50,644

3	18	67,294	17	64,867	16	68,978
4	19	39,099	18	40,967	13	37,013
5	17	75,761	14	56,869	17	65,821
6	15	24,764	19	76,227	17	69,557
7	14	51,434	18	93,835	16	86,559
8	17	59,676	13	64,304	17	68,308
9	20	75,526	14	56,321	20	65,213
10	22	72,288	17	72,263	20	85,760
11	21	65,048	15	52,230	19	89,795
12	13	46,568	20	58,784	18	91,122
13	15	50,593	21	63,088	15	67,149
14	19	70,876	22	70,632	12	72,260
15	21	59,926	15	47,467	15	67,149
16	12	46,619	18	47,562	15	66,144
17	10	39,454	20	59,191	18	87,108
18	14	61,602	19	59,993	20	89,383
19	19	74,762	20	75,516	18	79,728
20	18	81,193	16	53,241	13	74,781
21	24	96,485	17	60,920	15	80,356
22	20	83,116	19	70,837	14	70,424
23	21	91,788	23	78,510	15	52,200
24	18	86,111	20	76,788	12	53,847
25	16	58,339	17	90,429	17	96,669
26	16	60,785	17	89,100	16	71,115
27	18	92,119	19	81,327	14	65,111
28	17	84,739	17	70,626	17	74,209
29	18	94,529	19	89,151	13	65,301
30	18	99,242	23	91,681	16	63,869
31	20	95,568			16	71,366
TOTAL	546	2,121,129	540	2,037,461	499	2,213,761

As the above figures indicate, 69,262 tons vessel, per day in average touched during the above three months, however, the excessive 11,662 tons vessels per day in average means over-vessels for the anchorage allocated to civil vessels, that is very dangerous.

The above list indicates that these vessels waited at MITSURE and HESAKI to come into Moji Port due to shortage of anchorage and mooring space and also getting direction.

About 30% of vessels waited by the reason of shortage of anchorage and mooring space.

If such disadvantage will not be improved, these vessels will be forced to go to other Ports.

That means a great loss in view point of shipping economy.
