June 27th, 1946.

1st Demobilization Bureau

Among the seized articles which were already reported by "Shogai-hatsu" No.643 dated May 20th, 1946, an investigation was made on sawing machines through the memories of officials concerned and following items were made clear as a result of it. Thus it is hereby reported intermediately as follows:

1. The number of the machines which were supplied to various troops at home is approximately 700.
2. Some were lent to the evacuated works and school works.
3. Some were supplied to troops in Manchuria.
4. Among the remaining and brought home machines there were pretty many machines which were necessary to be repaired, but those were all destroyed by air-raid on March 10, 1945 at the detached works of Kameido.
5. It is also remembered that some were used in branch works, which will be reported as soon as informations reach.
